

# PRESS RELEASE

For immediate release SEPT 2014

## EPICURI

Introducing Epicuri, a ground-breaking new guest management application for forward-thinking restaurants. From the moment your guest thinks of you, Epicuri helps with booking, hosting and engaging your guests in a way **never** before possible.

**For the restaurateur**, it's a way to capture more orders, reduce effort and engage better with your guests. Accessed via a cloud-based app on a tablet, it focusses on front-of-house and makes sure interaction between guests and restaurant is handled seamlessly.

**For the guests** it's a stronger connection to you, their favourite restaurant! Guests can share their preferences/allergies/dietary requirements, browse menus, book takeaways and tables and even self-service certain items whilst at the table. All from the ultra-convenience of their own smartphones.

Launching at the Restaurant Show 2014 at Earls Court (Stand A121), Epicuri disrupts a market where restaurateurs are squeezed with high set up costs, fee's, premiums, maintenance contracts, per cover / per reservation, etc.

With launch pricing starting at just £49.99 per month (T&C's apply) this is the ideal time to get started with the future of the restaurant floor.
